Customer Churn Analysis Report

1. Project Overview

This project analyzes customer churn, revenue loss, customer lifetime value estimates, and churn patterns across customer groups.

2. Key Results

Total customers: 600

Churned customers: 247

Churn rate: 41.17%

Estimated MRR loss: Rs. 240,102.48

Simplified estimated CLV: Rs. 30,886.88

3. Visual Analysis

4. Recommendations

• Investigate customer groups with higher churn rates.

• Improve onboarding and support for new customers.

• Review payment-related issues and late-payment patterns.

• Contact at-risk customers with suitable retention offers.

• Monitor churn rate and recurring revenue loss regularly.

Note: CLV is a simplified estimate based on average monthly charges and average tenure. MRR loss is the sum of monthly charges for churned customers. Findings describe this dataset and do not establish causation.
